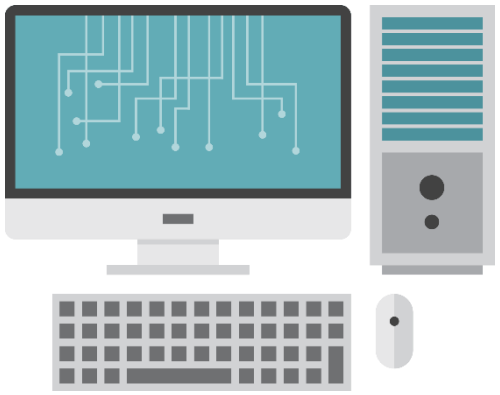
Configure Account Policies

Greg Shields

@ConcentratdGreg | www.pluralsight.com

pluralsight

What This Module Covers



- Configure domain and local user password policy settings
- Configure account lockout policy settings
- Configure Kerberos policy settings
- Delegate password settings management
- Configure and apply Password Settings Objects (PSOs)

pluralsight

PSO Precedence

Lower precedence values override higher precedence values.

PSOs applied directly to user objects override those applied to groups.

PSO settings override those applied via GPOs to the domain.
