# What This Module Covers

Configure Local Users and Groups

Configure User Rights Assignment

Configure Security Options Settings

Configure Audit Policy

Configure User Account Control (UAC)

Configure Security Templates

# Security Requirements

- Disable local built-in administrator and replace with “localadmin” user.
- Add IT group to administrators.
- Grant IT Backups group rights to perform remote backups.
- Enforce machine lock after 15 minutes of inactivity, and display user information once session is locked.
- Audit logon and account logon failure events.
- Audit removable storage.
- Enforce UAC for administrators and remove OTS elevation prompt.
- Disable UAC for software installations.

# Configure Local Users and Groups

- Disable local built-in administrator and replace with “localadmin” user.
- Add IT group to administrators.
- Grant IT Backups group rights to perform remote backups.
- Enforce machine lock after 15 minutes of inactivity, and display user information once session is locked.
- Audit logon and account logon failure events.
- Audit removable storage.
- Enforce UAC for administrators and remove OTS elevation prompt.
- Disable UAC for software installations.

# Configure User Rights Assignment

- Disable local built-in administrator and replace with “localadmin” user.
- Add IT group to administrators.
- Grant IT Backups group rights to perform remote backups.
- Enforce machine lock after 15 minutes of inactivity, and display user information once session is locked.
- Audit logon and account logon failure events.
- Audit removable storage.
- Enforce UAC for administrators and remove OTS elevation prompt.
- Disable UAC for software installations.

# Configure Security Options Settings
